

Transmission of documents and files; secure, efficient and provable. Regardless of where you are and regardless of where your recipient is. Unique solution for a secure and provable transfer of documents and files.

- ❖ Over 2/3 of companies are affected by data theft, sabotage or industrial espionage.
- ❖ Today, confidential data is still mostly transmitted with insufficient protection.

- How is your data protected against theft, sabotage, industrial espionage or manipulation?
- How do you improve process efficiency and make your data legally secure and provable?

## Simple - efficient - secure - unchangeable and provable at any time

DLS Handover was developed based on Distributed Ledger Technology and can ensure the highest confidentiality and security. The managed data is encrypted during upload and download to the DLS DLT-System. The encryption in our DLT provides the highest level of security with an unalterable history and a transfer that can be proven at any time. The files can only be read by the sender and after download by the receiver.

**DLS Handover takes document and data transfer security and provability to the next level.**

## Support for your application

- ❖ Privacy by design - Safety as a principle in technology design
- ❖ Highest security of all users and system data
- ❖ Unchangeable data history

## Use cases / business scenarios :

- ✓ Transfer of any kind of documents (pdf etc.) and files
- ✓ Accounting and company financial statements
- ✓ Offer and contract handover
- ✓ Evidence of your innovations/intellectual property
- ✓ Handover of HR documents
- ✓ Handover of GDPR/DSGVO protocols
- ✓ Use similar to a registered letter

Transfer of documents and files; secure, efficient, provable and cost-effective

**How does DLS Handover work? - It's easy: Choose a subscription, register and you're ready to go:**

1. Log into DLS Handover and select new transaction.
2. Select the file to be transferred with drag and drop.
3. Enter recipient mail and press the send button.
4. Recipient receives a mail with the link and a little later the 2nd mail with the code.
5. The recipient clicks on the link in the 1st mail and then enters the code of the 2nd mail.
6. The download of the file starts and the recipient only has to specify where he wants to save the file.

**No matter where you are - No matter where your recipient is.  
You can always hand over your documents in a provable way.**

**Fast, secure and with an unchangeable history.**

**Protected against tampering, sabotage, industrial espionage and ransomware/extortion.**
